ABOUT US

MOVING YOU FOR OVER 30 YEARS >>

After more than 30 years in business, Cambridge Rigging really knows how to move you. We've done every job – from moving a single piece of machinery across town to relocating an entire manufacturing facility across the globe – and we've done it safely and on schedule, every time.

Our broad range of practical experience in all aspects of a relocation project along with our partnerships on either side of many international borders enables Cambridge Rigging to offer a safe, seamless, on schedule relocation solution. This experience gives Cambridge Rigging the ability to anticipate and quickly overcome virtually any relocation challenge ... even at a global scale. The combination of highly skilled team members with specialized industry expertise and our comprehensive inventory of equipment to draw upon will ensure your next project is completed safely, on schedule, and on budget.

Cambridge Rigging was founded in 1983 in the heartland of Ontario's industrial basin. Located less than 1 km from Canada's busiest highway, our facility includes a modern computerized office, a large fabrication shop, over 50,000 square feet of secure inside storage and an additional 25 acres of fenced outside storage.

In the more than 30 years since we first opened our doors, we have regularly added new specialized equipment to our fleet, increased manpower and their level of expertise. Cambridge Rigging has grown and expanded its boundaries of service beyond Ontario to reach all of North America, South America, Europe and Asia.

Our years of expertise and experience allow us to offer custom insurance requirements to accommodate your project that our competitor's cannot offer.

WHAT IS A RIGGER?

A Rigger is a skilled person with a broad knowledge of methods to lift or move objects whose physical characteristics prevent an individual from handling it without mechanical assistance. Riggers utilize a variety of tools and machinery to accomplish his objective (including cranes, jacks, pulleys, winches, forklifts and others).

OUR SERVICES >>

Planning & Project Management

- ⊕ Project budgeting
- ⊕ Engineering services
- ⊕ Single or multiple machine relocations
- ⊕ Plant relocations
- ⊕ Turnkey project solutions
- ⊕ Project management
- ⊕ Multi-trade contracting, custom fabrication

Relocation

- ⊕ Single machine and multi machine in plant relocations
- ⊕ Machine relocations including transportation
- ⊕ Loading and offloading services
- ⊕ Millwright services

Transportation

- ⊕ Loading and unloading service
- ⊕ Multi-axle trailer combinations
- ⊕ Over dimensional load service
- ⊕ Rail car tie-down
- ⊕ Machinery relocation
- ⊕ Export packaging
- ⊕ Modular line transporter (self propelled)

Installation

- ⊕ Complete manufacturing line relocation
- ⊕ New Machine installation and Integration
- ⊕ Welding and Fabrication
- ⊕ Turn key machine installation

Secure Warehousing

Our Commitment

Cambridge Rigging is dedicated to the health and safety of its employees and the environment.

ENVIRONMENTAL POLICY >>

A strong dedication to the stewardship and preservation of the environment is one of our highest priorities. We manage all aspects of our business to ensure we meet all environmental and legal requirements and identify, assess, and manage any environmental hazards in full cooperation with industry standards and authorized government agencies.

We do not tolerate any waste or any deliberate or unsafe acts that may result in the pollution of our environment, and as part of our Health & Safety Policy, all employees receive on-going training in conjunction with our emergency procedures program on how to immediately recognize and avert environmental hazards.

HEALTH & SAFETY POLICY >>

Cambridge Rigging is vitally interested in the health and safety of its employees and will make every effort to provide a safe and healthy work environment. We expect all supervisors and workers to be dedicated to our objective of continually reducing risk of injury in our office and on our job sites.

Supervisors are held accountable for the health and safety of all workers under their supervision and are responsible to ensure machinery and equipment are safe and that their employees receive proper training on specific tasks and work in compliance with established safe work practices and procedures.
